SOURCE

1. Source heard from an acquaintance in Kladno (N 50-09, E 14-06) that underground hangars were being constructed along the highway running between Melnik (N 50-21, E 14-29) and Roudnice (N 50-25, E 14-15). The construction site was located about halfway between the two towns.
2. Source's acquaintance acquired this information in August 1954 while driving from Melnik to Roudnice. Noticing the construction site, he stopped his car to inquire about the nature of the construction but a guard came up to him and told him to move on since no cars were allowed to stop near the construction site. Upon arriving at Roudnice, the acquaintance asked his friends about the construction activity and was told that underground hangars were being built there.
3. Reference is made to page 2, this report, an overlay on GSGS 4416, 1:100,000, sheets S-8 Teplice Schonau and S-9 Mlada Boleslav, on which source identified the approximate location of the construction site (point 1).
